Page Two

Cloud Engineer (Aug 2020 - Feb 2022)

EMRGE (a cloud division of Kordia Ltd.)
Auckland, New Zealand

Design, plan, migrate, and deploy enterprise-scale, complex, secure cloud infrastructure solutions across multiple public cloud platforms, and ensure all cloud services are developed reliably and securely to meet customers' needs. Analyze business-critical infrastructure, applications, securities, and governance requirements. Provide and implement cloud best practices, cloud-native security advice, and recommendations. Design, implement, and optimize organizations' CI/CD processes and pipelines.

System Engineer (Jun 2018 - Aug 2020)

Kordia Ltd., Auckland, New Zealand

Implemented and managed enterprise infrastructure e.g. all aspects of Cloud & Hybrid environments and virtualization platforms. Identified and implemented automation, simplification, and migration to the Cloud. Developed and optimized automation scripts and templates, and assisted in infrastructure provisioning, monitoring, and system patching. Provided and delivered IT solutions and continued service improvement. Participated in enterprise infrastructure projects, engaged with internal and external stakeholders, communicated, and delivered project requirements within the agreed timeframe and acceptance criteria with Agile methodology. Acted as an escalation point and the go-to person within the team.

Freelance Cloud Consultant (Jan 2017 - Jun 2018)

Private Clients, Auckland and Shanghai

Planned, designed, implemented, and maintained private clients' IT infrastructure, which involved planning and implementing all aspects of the systems, including preparation of system design documentation, solutions, implementations, migration, automation, and security.

IT Specialist (Mar 2015 - Jan 2017)

BL Global Markets Ltd., Auckland, New Zealand

Designed and implemented company infrastructure and virtualized systems. Upgraded and migrated servers to the Cloud. Planned and monitored projects and ensured projects were completed promptly. Configured firewalls, routers, and switches and performed network diagnosis and troubleshooting, conducted system backups and restorations. Developed and maintained system documentation.

ICT Support Engineer (Apr 2011 - Mar 2015)

Hantec (NZ) Company Ltd., Auckland, New Zealand

Deployed and managed Windows servers, Linux instances, Exchange Servers, administered active directory, and Exchange users. Troubleshoot and resolve system platform issues and perform routine backups. Participated in designing/drafting BCP plans, and conducted testings. Monitored servers' performance and provided efficient and professional support to staff and customers.

EDUCATION

Postgraduate Diploma in Computer and Information Sciences (2010)

Auckland University of Technology

Bachelor of Science (Honors) (2008)

Macau University of Science and Technology
